

# RJC-SG Clip Series

The RJC-SG Clip series (patent pending) is specifically designed for Strongwell's Strongirt composite z-girts. The .040" thick polymer clips offset insulation from the face of the girt creating airflow for rear ventilating rain screen systems.

This clip can be used on vertically or horizontally oriented z-girts. Easily snapped onto the face of the Strongirt, these clips retain the rigid or semi-rigid insulation in place. The RJC-SG clip can also allow you to maintain the same thickness of insulation while creating different wall depths using various depths of girt.

RJC-SG Clips are shipped in a 12"x12"x12" box weighing approximately 10 lbs.

Renjo Clip -SG Series:	RJC-SG-0.5	RJC-SG-1.0	RJC-SG-2.0	RJC-SG-3.0
Clip offset depth	1/2"	1"	2"	3"
Flange thickness	1/4"	1/4"	1/4"	1/4"
Total airspace	3/4"	1-1/4"	2-1/4"	3-1/4"
Qty per box	625	450	200	150
Approx. sqft coverage <small>*based on 16"x18" o.c.</small>	1,250	900	400	300
